OK WATER SYSTEM

Company Profile

OK WATER SYSTEM has been in water industry since last 10 years.

Our motto is just to express that we supply the kind of water treatment system that deliver the mysteriously enchanting highpurified filter drinking water that is un-definable. The company deals in cleaning chemical, domestic, commercial & industrial water purification system

1.The following list of products, which we are manufacturing at our Plant. We also offer in the Generation System as per the requirement of the client from various Industries & packaged drinking water treatment systems for ground bore well river and tap water applications in standard capacities of potable water production from 10ltrs per hr to 50000 liters per hr and above size.

2. Single, double, triple pass R.O. water filters with and without U.V attachment, softener & water vending machines in various capacities.

- The company can design, manufacture and install customized system to meet our client's requirements. We have supply more than 450 industrial and domestic plants for various applications like various industries (Pharma, Textile, chemicals, Food & Beverages etc.), bottled water manufacturers, hospital, villages, schools, colleges, corporate offices, radiators for earth moving equipments etc.

We maintain state of the art technologies and equipment to assist our engineers in the selection and designing of the most effective water treatment systems for the type of raw water available to each individual client.

Service Offered

Water treatment plant base on reverse osmosis technology, Demineralization technology suitable for pharmaceutical industries , textile industries , green houses ,bottled water plant, beverages industries , village, swimming pool , farm houses, schools, colleges , hostels, villages, and various other places.

- Water softening plant for hard water for applications like industry, laundry, boiler, soft drink plant, ice factory etc.
- Annual maintenance contract for Water Treatment plants.
- We also offer the water treatment plants on Rent.
- Supply of spares and components for water treatment industry.

Following are the products, we offer in the Generation System as per the requirement of the client:

1. Industrial RO Plant for Various Industries
2. Demineralization Unit (DM)
3. Sea water Plant
4. Ultra Filtration Water Treatment Plant
5. Water Softening Plant
6. Purified Water Generation System
7. Effluent/Sewage Treatment Plant
8. Dialysis R.O. Plant
9. Packaged Drinking Water Turnkey Project
10. Swimming Pool Filtration Plant
11. Chemicals (Anti-Scallant /D-Scallant Chemicals)
12. Online Chillers
13. All Spares & accessories
